

## WhatsApp – Using on a Desktop

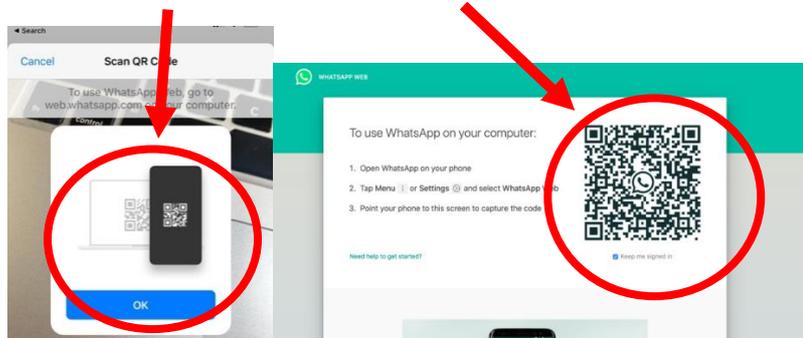

1. **WhatsApp Web** can be used on a Mac or Windows computer but first, you need to have downloaded and registered WhatsApp on your smart device (See *Factsheet – WhatsApp – Using on Apple Devices*).
2. Open any internet browser on your computer and type <https://web.whatsapp.com>. This **QR code** will appear on your screen

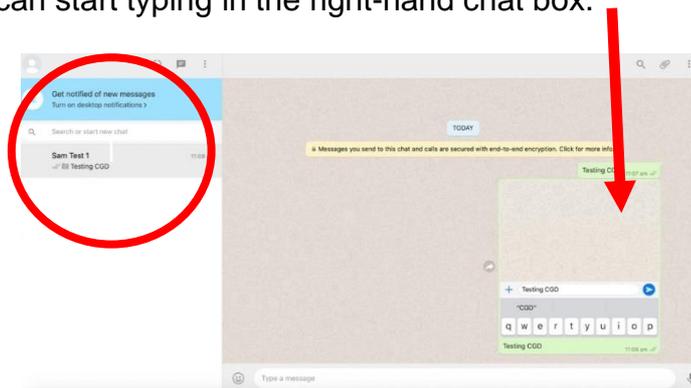

3. On your smart phone or device go to **Settings** in WhatsApp and click on **WhatsApp Web/Desktop**. Scan the **QR code** from the computer.

4. Hold the **Camera** screen over the **QR code** over the computer screen.

5. Once you have scanned the website's **QR code** on your phone or device you will see the WhatsApp window that mirrors your phone or device. All of your contacts will appear here.
6. To send **Messages**, tap on the contact from the list. After you have selected a contact you can start typing in the right-hand chat box.

7. To **Log out** from all devices go to **Settings** in WhatsApp on your phone or device and then click on **WhatsApp Web/Desktop** and tap on **Log out** from all devices.
